

Program Goals, Objectives and Outcomes Measures (2017)

Goal #1– The program will prepare graduates for supervised practice to become a Registered Dietitian Nutritionist in clinical, community, and foodservice areas.				
B) Objectives	C) Data Needed for Evaluation and Data Source	D) Evaluation Method(s) for Collected Data	E) Individual(s) Responsible for Ensuring Data Is Collected	F) Timeframe for Collecting Data (When is data collected?)
Eighty-five percent of students admitted to the program in the junior year will complete the program within three years.	Student records	Audit	Program Director	Annually
The percentage of graduates who apply for supervised practice within twelve months of graduation will be 60% or greater and will remain constant or improve over time.	Demographic Data	Senior survey Alumni survey	Program Director	Annually
Over 50% of graduates who apply for supervised practice placement will obtain a placement within 12 months of graduation and this will remain consistent or improve over time.	Internship application	Senior survey Alumni survey	Program Director	Annually
Over a five-year period, 85% of alumni will pass the CDR credentialing examination for registered dietitian nutritionists within one year following the first attempt.	RDN Exam pass rates	RDN exam results	CDR/ Pearson	Annually
Over a seven-year period, at least 50% of students who graduate with a BS in Dietetics and do not apply for supervised practice will apply for graduate or professional education.	Demographic Data	Alumni survey	Program Director	Annually
Over a seven-year period, supervised practice directors will rate 95% of program graduates satisfactory or higher for overall preparation for the supervised practice.	Demographic data	Supervised Practice directors survey	Program Director	Annually

A) Goal #2 – The program will promote professional values in graduates.				
B) Objectives	C) Data Needed for Evaluation and Data Source	D) Evaluation Method(s) for Collecting Data	E) Individual(s) Responsible for Ensuring Data Is Collected	F) Timeframe for Collecting Data
Fifty percent of students will become members of the Academy of Nutrition and Dietetics within six months of enrolling in the program.	Demographic information	Senior Survey	Program Director	Annually
Academy of Nutrition and Dietetics membership will be maintained for five years by 50% of program graduates.	Demographic data	Alumni survey	Program Director	Annually

A) Goal #3 – The program will produce graduates capable of graduate work and in interpreting and applying research to dietetics practice.				
B) Objectives	C) Data Needed for Evaluation and Data Source	D) Evaluation Method(s) for Collecting Data	E) Individual(s) Responsible for Ensuring Data Is Collected	F) Timeframe for Collecting Data
Program graduates will rate their research competence as satisfactory (3 on a 5-point scale) or higher on alumni surveys.	Demographic data	Alumni survey	Program Director	Annually
The mean rating of supervised practice directors for abilities of program graduates to conduct performance improvement or other research activities will be satisfactory (3 on a 5-point scale) or above.	Demographic data	Supervised Practice Directors Survey	Program Director	Annually

A) Goal #4 – The program will prepare graduates to work collaboratively and interprofessionally.

B) Objectives	C) Data Needed for Evaluation and Data Source	D) Evaluation Method(s) for Collecting Data	E) Individual(s) Responsible for Ensuring Data Is Collected	F) Timeframe for Collecting Data
Graduates will rate their abilities to function as team members as satisfactory (3 on a 5-point scale) or higher on surveys.	Demographic data	Alumni survey	Program Director	Annually
Supervised practice directors will rate the abilities of 95% of program graduates to function effectively in interprofessional and other teams as satisfactory (3 on a 5-point scale) or above.	Demographic data	Supervised Practice Directors Survey	Program Director	Annually
